# NITIN HARISHCHANDRA SHUKLA

nitinshukla7944@gmail.com | +91-8097138699 | Mumbai, India | GitHub: github.com/n0obcoders

## PROFESSIONAL SUMMARY

Cybersecurity professional pursuing M.Sc. in Cyber Security at the University of Mumbai, building on a B.Sc. in Computer Science, with hands-on experience in ethical hacking, OSINT-based threat analysis, vulnerability assessment, and malware analysis. Published researcher in network-protocol security diagnostics, seeking to contribute as a SOC Analyst, Penetration Tester, or Cybersecurity Analyst.

## EDUCATION

**M.Sc. in Cyber Security** 2025 - 2027 (Expected)
*University of Mumbai | Mumbai, India | SGPA: 8.0 / 10.0 (First Year)*

**B.Sc. in Computer Science** Jun 2022 - May 2025
*Thakur Ramnarayan College of Arts and Commerce | Mumbai University | CGPA: 8.93 / 10.0*

## PROJECTS

**NetworkSentinel — Cross-Platform Network Reconnaissance & QUIC Diagnostics** Published Research
*Rust | Nmap/Wireshark-style Scanning & Packet Capture | Npcap/libpcap | QUIC (RFC 9000) | Cross-Platform (Windows/Android)*

- Designed and built a memory-safe, cross-platform Rust framework unifying active host/service scanning, live packet capture and protocol decoding, bidirectional flow tracking, and PCAP post-mortem analysis in one CLI toolkit.
- Engineered a dedicated QUIC diagnostic subsystem implementing all five RFC 9000 security-relevant compliance tests (anti-amplification limit, Initial-packet padding, version negotiation, 0-RTT anti-replay, path validation) — a capability absent from Nmap and Wireshark.
- Compiled a single shared Rust core for Windows (Npcap) and Android (Termux), producing identical diagnostic output — including an A+ (100/100) QUIC audit grade — on both platforms.

***Published:*** *"NetworkSentinel: An Integrated Cross-Platform Framework for Network Reconnaissance, Packet Analysis, and QUIC Diagnostics," International Journal of Emerging Technologies and Innovative Research (JETIR), ISSN 2349-5162, Vol. 13, Issue 9, pp. c179–c183, Sept 2026.* View Paper

**Phishing Detection & Automated Takedown System**
*Python | URL/Domain Analysis | WHOIS | DNS Reconnaissance | SMTP Automation*

- Designed a phishing-detection system analyzing URL structure, IP-based domains, special characters, and WHOIS/domain-registration metadata to flag malicious sites.
- Engineered detection features (URL length, IP-address presence, domain-registration age) to improve classification accuracy.
- Built an automated abuse-reporting pipeline generating evidence-backed takedown requests routed to hosting-provider/registrar abuse contacts via SMTP.

**Internship Finder — Automated Outreach Web Application**
*Python | smtplib | SMTP Protocols | Streamlit*

- Built a Python-based cold-emailing system to reach potential clients and leads at scale with message personalization.
- Automated bulk, personalized email delivery using SMTP protocols via smtplib and the email library.
- Deployed the tool as a live web application on Streamlit Cloud for accessible, on-demand use.

## CERTIFICATIONS & VIRTUAL INTERNSHIPS

**Cybersecurity Virtual Internship - AICTE EduSkills** Jul 2025 - Sep 2025
*Supported by Palo Alto Networks | National Internship Portal, Ministry of Education | Grade: B (10 Weeks)*

**Cyber Security Internship (AICTE) - AISECT Learn** 4 Credits

- Deloitte Australia Cyber Job Simulation — Forage
- Mastercard Cybersecurity Virtual Experience Program — Forage
- Telstra Cybersecurity Job Simulation — Forage
- AIG (American International Group) Cybersecurity Analyst Job Simulation — Forage

**SQL Injection Attacks - EC-Council** Certification
**Cyber Security and Ethical Hacking - Quantum Learnings** Certification
**CCNA Networking - Self-Trained via Udemy**

## TECHNICAL SKILLS

**Security Domains:** Ethical Hacking, Junior Penetration Testing, Vulnerability Assessment, OSINT, Malware Analysis, Network Security, Phishing Detection & Threat Analysis, QUIC/Transport-Protocol Security, Database Vulnerability Assessment
**Security Tools:** Nmap, Wireshark, Burp Suite, Metasploit, WHOIS, DNSDumpster, VirusTotal, crt.sh, Shodan, Npcap/libpcap
**Programming & Automation:** Rust (Systems/CLI Tooling), Python (Intermediate), smtplib, Email Automation, Scripting for Security Tooling
**Platforms & Deployment:** GitHub, Streamlit Cloud, Cargo Workspaces, Web Application Deployment

## LANGUAGES

English (Proficient), Hindi (Native)
